Student Engineer in Health Technologies (EPISEN, UPEC), specializing in Big Data & AI. Currently completing a work-study program at the Ministry of the Economy (Python development and test automation), I am seeking a new work-study position for 2026 focused on AI applied to intelligent systems. Passionate about AI and data, I have led concrete projects in LLMs, computer vision, and machine learning.

Degrees and Education

● **Engineer Health Technologies (Big Data, AI, Network and Development)**
Since September 2025 **EPISEN (UPEC)** Vitry-sur-Seine

● **Bachelor of University Technology in Computer Science Data Administration, Management, and Exploitation Track**
From September 2022 to August 2025 **IUT de Créteil-Vitry (UPEC)** Vitry-sur-Seine

Professional Experience

● **Apprenticeship - Python Developer of Automated Tests**

Since September 2025 **French Ministry of Economy and Finance (DDFIP)** Versailles

- Development of **Python** scripts to perform **automated testing** on a Ministry of the Economy application
- **Security testing and non-regression** testing using Python
- Learning project management using the **AGILE** and **SCRUM** methodologies

● **Apprenticeship - IT Park Manager and Developer of Reliability Tools**

From September 2024 to August 2025 **French Ministry of Economy and Finance (DDFIP)** Versailles

- Development of a **mobile application using Dart/Flutter** to conduct inventory
- Creation of **AutoIT** and **Python** scripts for the automation of specific procedures.

● **Internship – Development of Websites and Mobile Applications Integrating AI**

From april 2024 to July 2024 **Laboratory for Images, Signals, and Intelligent Systems (LISSI)** Vitry-sur-Seine

- **European Consortium** involving the airports of Paris, Milan, Cluj, and Zagreb, led by the **ADP Group**
- **Computer vision** for plant recognition using **Python**
- Creation of **scraping scripts** using Python (**BeautifulSoup** and **Selenium**)

University Projects

BUILD AI - Platform enabling educators in the construction industry to create courses using scraped resources and an LLM (Large Language Model).

- **Scraping of data** in the construction field via **Python Scripts (Beautiful Soup)**
- Creation of a **multimodal database architecture (Vector, Graph, Document)**
- **Fine-Tuning of an LLM (Mistral 8B)** on the scraped data
- Development of a mobile application using **Dart/Flutter**

Skills

Python

Librairies: Pandas, Matplotlib, Numpy, Scikit-Learn, Folium, NetworkX, Flask, TensorFlow, OpenCV

Machine Learning

K-NN, Naïves Bayes, LDA, Decision tree

Database

- SQL database
- Use of PL/SQL for the creation of Triggers, Cursors, and transactions
- No-SQL Database (Vector, Graph, and Document)

Excel and Power BI

Data Cleaning, Structuring, and Visualization
